PROFESSIONAL EXPERIENCE

Front-End Web Developer

Glumia.ng   **July 2024 – July 2025**

- Operate in an Agile-driven environment to efficiently maintain project timelines and optimize resource utilization.
- Produce websites that are compatible with multiple browsers, ensuring a consistent user experience across different platforms.
- Develop and maintain user-facing websites using HTML, CSS, TypeScript, and ReactJS, Material UI, ensuring responsive and interactive user experiences.
- Utilized Firebase for authentication and real-time data handling, enabling secure and scalable user management. Employed Redux Toolkit for efficient and maintainable state management across modules, improving performance and reducing boilerplate. Structured the codebase using a Monorepo architecture, allowing seamless collaboration between frontend and shared logic, ensuring consistency and scalability across services.

Front-End Web Developer

Instiq Professional Services   **January 2022 - Present, Lagos, NG**

- Integrated regulatory and compliance standards into product designs, ensuring adherence to industry regulations and guidelines.
- Adhere to internal risk control and liability mitigation guidelines, ensuring compliance and reducing potential risks.

- Operate in an Agile-driven environment to efficiently maintain project timelines and optimize resource utilization.
- Produce websites that are compatible with multiple browsers, ensuring a consistent user experience across different platforms.
- Develop and maintain user-facing websites using HTML, CSS, JavaScript, and ReactJS, ensuring responsive and interactive user experiences.

Front-End Web Developer

Instiq Professional Services   December 2020 – December 2021, Lagos, NG

- Collaborated with team members to build a scalable admin and user dashboard web application for a rider app using Vue. JS.
- Developed the interface and integrated APIs for a customer service web application using ReactJS in collaboration with my team members.
- Developed HTML email templates for Access Congo banking applications.
- Wrote scalable and reusable code for a time solution and report modules, integrating APIs to generate table data and user information.
- Developed a responsive administrative dashboard web application using React.js and Material-UI.

Teacher (Nysc)

Blossom Hill Schools   September 2019 – July 2020, Lagos, NG

- Marked, graded, and assessed student performance as a class teacher for SS1 students, ensuring accuracy and providing constructive feedback to foster academic growth.
- Prepared lesson notes and exam questions.
- Taught English and diction to primary and secondary classes.
- Developed a responsive administrative dashboard web application using React.js and Material-UI.
- Developed personalized learning plans to cater to individual student needs, enhancing academic progress and engagement in the classroom.
- Implemented student performance tracking systems to monitor progress and identify areas for academic improvement among SS1 students.

Website Manager

Otutu Lagos   March 2017 - March 2019, Lagos, NG

- Managed website content and updates to ensure relevance and accuracy.
- Implemented SEO strategies to improve search engine rankings.
- Collaborated with cross-functional teams on website projects and initiatives.
- Managed relationships with external vendors and service providers related to website hosting and maintenance.
- Developed and executed digital marketing campaigns to drive traffic and engagement.

PROJECTS

UBA CAB (Customer appointment booking app)
Built a single-page application used for booking appointments by customers.

UBA SRG APP

Built a scalable application used to create questions for tellers and also to generate top-answered questions.

UBA CIMM (Card Inventory and Monitoring Systems)
Collaborated on all stages of the systems development lifecycle from requirements gathering to production releases.
Deployment of application to servers.

Queue Management
Queue Management is an application for crowd control in a banking hall. I single handedly developed the application using React Js , Material UI and Context API for state management.

TME CORE-MFB
Transaction Made Easy Core Banking Application for Microfinance Banks This is a core banking application for microfinance banks. With the app, banks can process day to day banking activities that includes, Loan booking, investment booking, teller operations, etc. I was part of the front end team that developed and implemented all API using React Js and Redux for state management.

PPAI Web Application
Developed a responsive and user-friendly microfinance web application,using React, Javascript, and Material-UI. The platform enables efficient customer registration, loan applications, loan repayments, and product selection. I built and maintained core modules such as customer onboarding with form validation and feedback, a loan application system allowing users to select from various loan products, a repayment feature for tracking and processing payments, and a loan product selection interface tailored to individual customer needs.State management was implemented using Redux to ensure smooth data flow across the application, while Axios was used to integrate with backend APIs for dynamic operations. Form handling and validation were managed with Formik and Yup to ensure robust user input handling. I also applied internationalization support and followed accessibility and performance best practices. Throughout development, I collaborated with backend developers and ensured a fully responsive design for optimal performance across devices.

EDUCATION

Bachelor of Science Microbiology in Microbiology 2018
Olabisi Onabanjo University. • Ogun, NG
